

Technical Designer/Drafter

Job Description

Our design group is currently seeking a candidate with a strong combination of technical skills, creative flare and practical knowledge to apply to real-world situations.

Our ideal candidate should have the ability to develop detailed drawing packages from concepts to production documentation. The right person will be introduced to a diverse assortment of design/build projects, working alongside a talented and diverse group of designers, fabricators, project managers and internal and external resources supporting these efforts.

This position requires:

1. A working knowledge of design and fabrication processes, as well as the methods and materials that are common to this industry.
2. The ability to interpret the creative intent of the design team and possess the ability to troubleshoot problems with creative solutions and alternatives mid-stream.
3. Hand sketching ability sufficient to create presentation art and to communicate ideas through the design intent process
4. The ability to create, develop and translate illustrative concepts into 3 dimensional spaces, including layouts, elevations and sections.
5. The ability to develop technical and mechanical fabrication drawings to be used for internal and third-party fabrication.
6. Professional communication skills, capable of articulating critical project details to a wide audience.
7. Expertise in AutoCAD with the ability to work in the following design programs: Rhino, Sketch-up, 3D Studio Max, Photoshop and Illustrator

The ideal candidate should also have:

- Flexibility with the creative process and client needs
- A positive, energetic attitude and the ability to build positive relationships with the team
- The ability to juggle any number of project assignments at any given time.
- Exception organization skills and attention to detail
- The ability to manage any number of project assignments at any given time
- The desire to succeed and motivate others as well as being self-motivated
- Maintain a satisfactory attendance record.
- Maintain confidentiality of employee, department, and company business.

Qualifications:

- At least 5 years working within a relevant professional firm/industry
- At least 5 years of working in AutoCAD
- At least 5 years of working in drafting with focused experience around mechanical drawings on multiple types of projects.
- Requires a Design Degree related in Architecture, Industrial Design, or Mechanical Engineering.
